Dear Careers Engineering Team,

I am writing to you because I am interested in your Data Analyst job posting. I am a passionate data analyst dedicated to analyzing various data across multiple domains. I would like to work in your team by providing useful results for your business.

I have completed two significant training courses such as Data Analyst Nanodegree program and AWS Machine Learning Foundations. I also have a master's degree in decision-making information system (Business Intelligence). I have been a software engineer for more than four years so, I have all the necessary skills to become a data analyst in your company.

I hope to bring my expertise as a data analyst with my background in software development to your company. I am available for an online meeting. I look forward to speaking with you to discuss my qualifications in more detail. Thank you for your consideration

Best regards,

Laetitia NGOMTCHO
